LM

feel the
difference

Your skills are worth LM

Whether it comes to the design or the production of the LM-Dental instruments, we focus on the specific needs of the dental experts. We are in a constant communication with the end users of our products to keep our product development on the cutting edge. We are the innovation leader that others copy. Our radical product theses of the 1980s – a thicker handle, optimized shape, elastic surface, lightness and color coding – have become industry wide standards in the 21st century.

The ergonomics has been the guiding light of our product development since the establishment of the company. Based on new research we now know more than ever about ergonomic instrumentation. The result is LM-ErgoSense, a future icon in dentistry. With contemporary coating technology we are able add on additional features, that offer unique benefits for you and your patient. Sharpen free periodontal and non-stick restorative instruments are finally reality.

In addition to the new level of ergonomics, LM-ErgoSense offers new opportunities with its built-in RFID technology, which together with scanning readers and software create a unique LM Dental Tracking System™.

You can feel the difference and so does your most satisfied patient.

PLANMECA

LM-Dental is part of the Planmeca Group, one of the world's leading manufacturers of dental equipment.

The pioneer in INSTRUMENT ERGONOMICS

How to define the ergonomics of a hand instrument? Firstly a non-slip, natural grip on an instrument are essential. Secondly a lightweight and optimized design prevents effectively occupational diseases. Thirdly a good tactile sensitivity and easy handling of the instrument guarantee the best clinical results. Reliability, wear resistance and comfort are the features that will be evident for both, the dentist and the patient. These are the guiding principals how Pekka Kangasniemi, DDS, one of the founders of LM, defined instrument ergonomics already in the 1980s.

Still today our aim in product development is to innovate together with the clinicians. Based on new research we now know more than ever about ergonomic instrumentation. The result is LM-ErgoSense, which fits the hand perfectly, enables relaxed grip and offers ultimate tactile sensitivity.

Contemporary coatings offer new benefits

With contemporary coating technology we are able to add additional features to our dental instruments offering unique benefits. Sharpen free periodontal and non-stick restorative instruments are finally reality. The Dark Diamond instruments with non-stick diamond like coating allow for pleasant and precise contouring of composite resins.

Sharpen or not?

In periodontics the hot discussion topic has been whether instruments should be sharpened or not. In both cases LM periodontal instruments are ultimate in metallurgy. The high wear resistance and hardness of the blade metal makes them efficient, long-lasting and comfortable. Resulting from the advanced material technical research and modern micro coating technology LM can offer the highest quality in both uncoated and coated product categories.

Sharpen free - The micro coated Sharp Diamond instruments are completely sharpen free and razor sharp.

Resharpen - If you wish to resharpen the uncoated LM-DuraGradeMAX supersteel offers you the ultimate wear resistance.

The choice is yours.

Elastic, ergonomic surface material and optimal contouring
- comfortable and non-slip grip

Special alloyed metal core
- lightweight structure
- metal-to-metal connection for enhanced tactile sensitivity

Optimal rigidity
- excellent sensitivity and efficiency
- outstanding corrosion resistance

Hand-finishing
- sharp cutting edge

Precision formed tips
- extremely sharp, smooth cutting edge

High-tech production technology

Like every true professional we also aim for the ultimate perfection in our work. LM-Dental devotes its entire product development and production process to achieve the best possible quality in all our products for you to have the very best tools to work with. We deliver the highest of quality to guarantee your success in the treatment results. All our products are produced in Scandinavia. We give our high-tech products a handmade finish to gain a top-quality end result and highest functionality.

UNCOATED

LM-DuraGradeMAX supersteel

- High wear resistance
- Immune to corrosion
- Can be resharpened

COATED

DARK DIAMOND non-stick coating

- Exclusive diamond like coating for restorative instruments
- Extremely hard & smooth surface
- Easy non-stick application and modeling of composite
- Dark color for maximum contrast

NON-STICK

Enjoy sharpen free prophylaxis & perio

Opposites attract. This holds true with high-quality, periodontal instruments. Optimally they are razor sharp, extremely hard, yet smooth and light. A new micro membrane coating made using modern Physical Vapor Deposition (PVD) technology enables LM to create Sharp Diamond instruments with the optimum combination of these features. Sharp Diamonds are completely sharpen free, tough but refined, offering unique benefits for you and your patient.

"It's great that I don't need to waste my time on sharpening any longer! Since the Sharp Diamond instruments are totally sharpen free, I can concentrate on the clinical work. Even my patients have noticed how these instruments feel more comfortable and are quieter. I can remove calculus with controlled strokes using extremely light grip. The long-lasting sharpness really makes a difference!"

Anna, Registered Dental Hygienist, USA

COATED

SHARP DIAMOND sharpen free coating

- Micro membrane coating for periodontal instruments made using the most advanced PVD (Physical Vapor Deposition) technology
- Completely sharpen free
- Superior long-lasting sharpness
- Maximal wear resistance

Cutting edge of the Sharp Diamond curette and the magnification of the edge after the test.

Cutting edge of a typical non-coated curette and the magnification of the edge after the test.

CHOOSE SHARP.

SHARPEN FREE MICRO COATING

You will enjoy full control and improved tactile sense while easily effectively removing the calculus.

LM ErgoSense

SENSATIONAL GRIP AND UNIQUE INTELLIGENCE

Today the focus is on ergonomics – without losing sight of efficiency. The LM-ErgoSense hand instrument meets both of these requirements and is truly a unique combination of ergonomic design and integrated new technology. It is the outcome of intense research and product development in close cooperation with dental clinicians and professionals. An ergonomic, high quality hand instrument naturally feels good in the hand. Even genuinely sensational as the smart LM-ErgoSense has been described.

Rated as the best hand instrument

The value of a truly ergonomic instrument grip can never be emphasized enough as revealed in several scientific studies. A hand instrument with thick silicone handle has been found to be more usable, cause lower perceived strain and to be more productive than those with thinner handles (1). LM-ErgoSense was rated as the best in ten out of fourteen specified usability features compared with the other tested instruments in a dental scaling simulation (1). It was also ranked as the best instrument.

Most participants in the authentic scaling part of the study considered the LM-ErgoSense silicone handle as their favorite due to the enhanced grip, comfort and instrument's functional design. The participants' evaluations were based on their active use of the LM-ErgoSense in authentic clinical work. In another study focusing on ergonomics, usability characteristics and work productivity using different manufacturers' hand instruments the thick, silicone coated LM-Dental hand instruments were the most preferred choice in regard to all 18 usability criteria used in the test (2).

The story of LM-ErgoSense

in clinical testing

LM Dental Tracking System™ IMPROVING MATERIAL FLOWS AND PATIENT SAFETY

Key advantages

Patient safety

- Safe materials
- Sterilized instruments
- Material traceability

Cost reduction

- Avoid time consuming manual controls
- Decrease stock
- Improve material flow

Asset management

- Ease consumption recording
- Indication of demand
- Improve time management

Documentation & education support

- Reduce risks
- Decrease loss
- Clinical training
- Patient session planning

What if you could see the exact location of every dental instrument and material on your computer? LM Dental Tracking System™ (DTS) is the first commercially available system to use RFID technology to efficiently track and monitor instruments and materials in the dental industry.

The LM-ErgoSense hand instrument with advanced built-in RFID technology together with scanning readers and server software create a unique Dental Tracking System™. The cutting edge system gives the visibility of instruments and materials from storage and maintenance through to clinic and patient care. The scanned and documented information improves patient safety, material handling and increases cost efficiency. DTS offers new possibilities within maintenance and clinical use for dental clinics.

More info on www.dentaltracking.com

Choosing the handle

Choosing the most ergonomic hand instrument can make a big difference in terms of discomforts and disorders when performing dental work. It is by no means insignificant what the diameter of the hand instrument's handle is or what the material of the grip surface is. When holding the instruments for approximately 2,000 hours each year, the design, weight and feel of the instrument are crucial for the dental practitioner in terms of his/her performance and productivity.

LM instruments are available with a selection of different handles. All exceptionally ergonomic due to the elastic silicone coating and optimized contouring. The clinician's hand fit and indication both play a role in selecting an ideal handle type. Interchanging different handles, may place the user's hand under even less strain.

Colors, naming and coding

- To facilitate color coding and brighten up working practices LM-ErgoSense, LM-ErgoMax and LM-ErgoNorm instruments come in refreshing colors.
- The name and the code number on the handle ease the identification of the instrument during clinical procedures and maintenance.

Handle selection

LM-ErgoSense

The larger diameter and design provide sensational grip that has been proven to be ergonomic and efficient in scientific clinical testing. Uniquely intelligent handle with the option for RFID tagging. The compatibility with the LM Dental Tracking System™ offers many opportunities to improve asset management and patient safety (see more on www.dentaltracking.com).

LM-ErgoMax

Classic ergonomic design that others copy. Functions well in all clinical procedures and guarantees excellent tactile sensitivity and relaxed grip.

LM-ErgoNorm

The thinner handle that functions best in light clinical procedures.

Codes and diameters

TERMS OF WARRANTY

Limited Warranty

The following warranty terms apply to the sale of LM-Instrument Oy's products (hereinafter "Products") to a purchasing company or individual by LM-Instruments Oy (hereinafter "LM").

LM hereby warrants that the Products will be free from defects arising from faulty materials or workmanship for a period of twenty four (24) months from the date of purchase by a customer from LM's authorized dealer (hereinafter "Authorized Dealer"). The warranty period is exceptionally three (3) months for products with a life inherently shorter than 24 months due to normal wear and tear (for example tips of hand instruments, tips of ultrasonic scalers, tips of endodontic files, front surface mirrors and grinding stones of sharpening devices) and for RFID tags to dental instruments manufactured by third party manufacturer (hereinafter "Third Party").

This warranty shall not apply to Products or parts thereof;

- a) which have been subject to abuse, misuse, negligence or accident or are not connected to proper power supply;
- b) to which any modification, alteration or attachment has been made without written consent of LM;
- c) which are installed or operated violating instructions for installation, use and maintenance; or
- d) which are normally consumed in operation (for example working tips of LM-MultiHolder and strips for LM-Cello).

End-user is entitled to install RFID tags to dental instruments manufactured by Third Party. When installing RFID tags to the dental instruments manufactured by Third Party (hereinafter "Instruments"), end-user is liable to check warranty terms and product information of the Instruments to ensure that instalment does not have adverse effect to Instruments or to the terms and conditions applied between end-user and its suppliers. End-user shall install RFID tags to Instruments or get those installed by LM or other party at its own risk. LM shall not be liable for any damages accrued due to the instalment of RFID tags to Instruments. This limitation of liability does not apply in respect of damage caused by

- a) negligence of LM when installing the RFID tags to Instruments, or
- b) RFID tags defective at the time of delivery to end-user

to personal private property, or personal injury or death.

The sole and exclusive remedy under this warranty shall be limited to correct or circumvent the errors or to repair or replacement of defective parts of Products, EXW LM's factory, providing that a written claim of the defect is sent to LM within the warranty period and the original part is returned to LM's factory by the Authorized Dealer, and LM's inspection establishes the existence of such a defect.

The end customer must contact the Authorized Dealer from whom the Products were purchased to request repair or replacement under this warranty and a written claim of the defects and send the original Product to the Authorized Dealer. This warranty is void if service or repair is performed by persons not authorized by LM.

Any products not manufactured by LM, carries only such warranty, if any, as given by any manufacturer thereof.

This warranty is the LM's only warranty in respect of the Products and LM disclaims all other warranties, whether of merchantability, fitness for particular purpose or otherwise, guarantees and liabilities, express or implied, arising by law or otherwise. In no event shall LM be liable for any general, consequential or incidental damages, loss of use or loss of profits by reason of LM's negligence or otherwise in connection with the sale, delivery, installation, repair or use of the Products.

LM shall have no liability whatsoever to the Authorized Dealer or end customer or any other person for or on account of any injury, loss or damage of any kind or nature, sustained by, or any damages assessed or asserted against, or any other liability incurred by or imposed upon the handling, use, operation, maintenance or repairs of Products by anyone other than LM. This exclusion of liability does not apply pursuant to the laws on product liability in case of personal injury and property damage to privately used objects resulting from the Products.

MIRROR HANDLES

Simple stem

LM 25 mirror handle threads are in accordance with international standard M2.5. The mirror shank must have a diameter of 2.5 mm.

Mirrors are sold separately.
Product no 10P12, box of 12 pcs, mirror #4 simple stem.

Cone socket

LM 28 mirror handle threads are in accordance with international standard UNF4-48. The mirror shank must have a diameter of 2.6 mm.

Handle options:

PERIODONTICS – SHARP DIAMOND COATED INSTRUMENTS

NEW COATING!

LMSharpDiamond - Enjoy sharpen free prophylaxis and perio

LM Sharp Diamond instruments are completely sharpen free. These instruments are made from exceptionally durable special metal alloy, and its wear resistance is enhanced by a protective micro membrane coating.

Sharpness & comfort

Sharp Diamond instruments with LM-ErgoSense handle are especially suitable for clinicians who use hand instruments frequently and want to minimize the time spent maintaining dental instruments. These instruments combine optimal characteristics of superior sharpness, tactile sensitivity and comfort.

Better instruments, better outcomes

Sharp Diamond instruments are well-suited for all forms of scaling. These instruments retain their original functionality, size and shape throughout their lifetime. The time saved from sharpening can be used for productive work and promotion of health. Choose sharp and work efficiently.

“ It's great that I don't need to waste my time on sharpening any longer! Since the Sharp Diamond instruments are totally sharpen free, I can concentrate on the clinical work. I can remove calculus with controlled strokes using extremely light grip. The long-lasting sharpness really makes a difference!”

Anna, Registered Dental Hygienist, USA

ENJOY PERIO.

SICKLE SCALERS

For the removal of supragingival calculus.

Instrumentation:

For calculus removal place the tip third of the scaler's cutting edge against the tooth. Tilt the instrument toward the tooth to achieve 70° to 80° angle between the tooth and the blade. Apply lateral pressure and activate the scaler by using vertical, diagonal or horizontal pull strokes. To maintain control use short 2-3 mm long strokes.

Design:

- Triangular cross section
- Face perpendicular to the lower shank
- Two cutting edges (red line)
- Pointed tip

Handle options:

Micro Sickle

- LM-ErgoSense** LM 301-302 ES
- LM-ErgoMax** LM 301-302 XSI
- LM-ErgoNorm** LM 301-302 SI

- 204SD design
- Delicate working end
- Elongated shank

Available also as Sharp Diamond coated sharpen free LM-ErgoSense instrument, see page 17.

Delicate working end. Especially for tight interdental spaces.

Sickle LM204S

- LM-ErgoSense** LM 303-304 ES
- LM-ErgoMax** LM 303-304 XSI
- LM-ErgoNorm** LM 303-304 SI

- Sharply angulated shank and very fine working end

For all tooth surfaces, especially proximal surfaces.

Mini Sickle

- LM-ErgoSense** LM 311-312 ES
- LM-ErgoMax** LM 311-312 XSI
- LM-ErgoNorm** LM 311-312 SI

- Fine, slightly angled blade
- For all tooth surfaces

Available also as Sharp Diamond coated sharpen free LM-ErgoSense instrument, see page 17.

Sickle LM23

- LM-ErgoSense** LM 313-314 ES
- LM-ErgoMax** LM 313-314 XSI
- LM-ErgoNorm** LM 313-314 SI

- Shorter blade and longer lower shank than in the Mini Sickle

Available also as Sharp Diamond coated sharpen free LM-ErgoSense instrument, see page 17.

Crane-Kaplan

- LMErgoSense** LM 322-323 ES
- LMErgoMax** LM 322-323 XSI
- LMErgoNorm** LM 322-323 SI

- Extremely strong, rigid, sharply angled blade
- For removal of heavy supragingival calculus

Mini Kaplan

- LMErgoSense** LM 333-334 ES
- LMErgoMax** LM 333-334 XSI
- LMErgoNorm** LM 333-334 SI

- Same angle but with a more delicate blade than in the Crane-Kaplan

Push Scaler H4-H5

- LMErgoSense** LM 144-145 ES
- LMErgoMax** LM 144-145 XSI
- LMErgoNorm** LM 144-145 SI

- The chisel-like working end used by pushing. The jacquette working end used by pulling.
- 90° working surface

Scaler H6-H7

- LMErgoSense** LM 146-147 ES
- LMErgoMax** LM 146-147 XSI
- LMErgoNorm** LM 146-147 SI

- For all tooth surfaces

Available also as Sharp Diamond coated sharpen free LM-ErgoSense instrument, see page 17.

Laplander

- LMErgoSense** LM 148-149 ES
- LMErgoMax** LM 148-149 XSI

- Similar to H6-H7 but with a lateral bending
- Easy access to molar area and proximal surfaces

UNIVERSAL CURETTES

Designed for the removal of moderate and heavy calculus from all supra- and subgingival tooth surfaces.

Instrumentation:

For calculus removal place one of the cutting edges of the universal curette against the tooth surface. Tilt the instrument toward the tooth to achieve 70° to 80° angle between the tooth and the blade. Apply lateral pressure and activate the curette by using vertical, diagonal or horizontal pull strokes. Both cutting edges of the same curette can be used by simply tilting the instrument one way or the other.

Design:

- Working end perpendicular to the lower shank
- Two cutting edges (red line)
- Rounded tip

Handle options:

LMergoSense

LMergoMax

LMergoNorm

McCALL

Strong blade with rigid shank.

McCall 13S-14S

- LMergoSense LM 222-223 ES
- LMergoMax LM 222-223 XSI
- LMergoNorm LM 222-223 SI

- For incisors and premolars

Mini McCall 13S-14S

- LMergoSense LM 222-223M ES
- LMergoMax LM 222-223M XSI
- LMergoNorm LM 222-223M SI

- For deep, narrow pockets
- Sharper, slightly rounded tip (not sickle-shaped)

Curette LM 15-16

- LMergoSense LM 225-226 ES
- LMergoMax LM 225-226 XSI
- LMergoNorm LM 225-226 SI

- Alternative for the McCall 13S-14S
- For removal of heavy calculus

McCall 17-18

- LMergoSense LM 277-278 ES
- LMergoMax LM 277-278 XSI
- LMergoNorm LM 277-278 SI

- Especially for broad molar surfaces
- Strong, uniform-width working end

McCall 17S-18S

- LMergoSense LM 279-280 ES
- LMergoMax LM 279-280 XSI
- LMergoNorm LM 279-280 SI

- Excellent in tight interdental spaces
- More delicate blade, working end narrower than in 17-18

LANGER

Langer curettes combine universal curette's working end with Gracey curette's shank angulation. Angulations ease access to difficult areas and both mesial and distal surfaces can be treated with the same instrument end.

Langer 1/2

- LMErgoSense** LM 281-282 ES
- LMErgoMax** LM 281-282 XSI
- LMErgoNorm** LM 281-282 SI

- For premolars and molars in the lower jaw

Langer 3/4

- LMErgoSense** LM 283-284 ES
- LMErgoMax** LM 283-284 XSI
- LMErgoNorm** LM 283-284 SI

- For premolars and molars in the upper jaw

Langer 5/6

- LMErgoSense** LM 285-286 ES
- LMErgoMax** LM 285-286 XSI
- LMErgoNorm** LM 285-286 SI

- For incisors in the upper and lower jaw

MINI LANGER

Mini Langers have longer shanks and shorter working ends than standard Langers. Useful in tight interdental spaces. Better access into tight deep pockets and furcations.

Mini Langer 1/2

- LMErgoSense** LM 281-282M ES
- LMErgoMax** LM 281-282M XSI
- LMErgoNorm** LM 281-282M SI

- For premolars and molars in the lower jaw

Mini Langer 3/4

- LMErgoSense** LM 283-284M ES
- LMErgoMax** LM 283-284M XSI
- LMErgoNorm** LM 283-284M SI

- For premolars and molars in the upper jaw

Mini Langer 5/6

- LMErgoSense** LM 285-286M ES
- LMErgoMax** LM 285-286M XSI
- LMErgoNorm** LM 285-286M SI

- For incisors in the upper and lower jaw

GOLDMAN FOX

Goldman-Fox 3

LMErgoSense LM 233-234 ES
LMErgoMax LM 233-234 XSI
LMErgoNorm LM 233-234 SI

- For premolars and molars

COLUMBIA

Columbia 2L-2R

LMErgoSense LM 217-218 ES
LMErgoMax LM 217-218 XSI
LMErgoNorm LM 217-218 SI

- For incisors and premolars

Columbia 4L-4R

LMErgoSense LM 219-220 ES
LMErgoMax LM 219-220 XSI
LMErgoNorm LM 219-220 SI

- For incisors, canines and premolars
- For heavier calculus

Available also as Sharp Diamond coated sharpen free LMErgoSense instrument, see page 17.

Columbia 13-14

LMErgoSense LM 237-238 ES
LMErgoMax LM 237-238 XSI
LMErgoNorm LM 237-238 SI

- For molars

BARNHART

Barnhart 5-6

LMErgoSense LM 227-228 ES
LMErgoMax LM 227-228 XSI

- For molars
- Shorter lower shank

Available also as Sharp Diamond coated sharpen free LMErgoSense instrument, see page 17.

LM INNOVATION

LMSyntette

Dual Gracey, a combination of universal curettes Gracey 11/12 and Gracey 13/14, designed for the removal of supra- and subgingival calculus.

For both concave and convex surfaces. Distal and mesial surfaces of the same interdental space can be treated with the same instrument tip. Suitable for both vertical and horizontal techniques.

Clinical use

Design:

- Two elliptical cutting edges
- Rounded toe

In the late 70-ties Swedish dentist Leif Ericsson, the Head of the Periodontological Department in Västervik Hospital, was challenged with the complexity and the amount of instruments there were available for the periodontal specialists.

Read story of LM-Syntette, the original dual Gracey at www.lm-dental.com/lm-syntette

LM-Syntette

- LMErgoSense LM 215-216 ES
- LMErgoMax LM 215-216 XSI
- LMErgoNorm LM 215-216 SI

- For all tooth surfaces

Available also as Sharp Diamond coated sharpen free LM-ErgoSense instrument, see page 18.

Mini Syntette

- LMErgoSense LM 215-216M ES
- LMErgoMax LM 215-216M XSI
- LMErgoNorm LM 215-216M SI

- Excellent in tight, deep pockets
- Particularly well adapted for use on premolars' and incisors' palatal and lingual surfaces

Available also as Sharp Diamond coated sharpen free LM-ErgoSense instrument, see page 18.

DIAMOND FILES

Diamond coated files are designed for cleaning deep concave root surfaces in anatomically difficult areas.

Can be used with multidirectional strokes.

Concavity Diamond File
SV 5-6

- LMErgoSense** LM 255-256D ES
- LMErgoMax** LM 255-256D XSI
- LMErgoNorm** LM 255-256D SI

- Diamond coated round curved toe
- For acute furcation lesions

Furcation Diamond File SV
7-8

- LMErgoSense** LM 257-258D ES
- LMErgoMax** LM 257-258D XSI
- LMErgoNorm** LM 257-258D SI

- Diamond coated egg-shaped toe
- For deep furcation lesions

Diamond File mes-dist

- LMErgoSense** LM 263-264D ES
- LMErgoMax** LM 263-264D XSI

- Extremely delicate diamond coated instrument for definitive scaling of the root surface
- Easy access with a fine, flexible blade in mesial-distal line angles and developmental grooves

Furcation Diamond File

- LMErgoSense** LM 261-262D ES
- LMErgoMax** LM 261-262D XSI

- Extremely delicate diamond coated instrument for definitive calculus removal in furcations and root depressions
- Easy access with a fine, flexible blade design

FURCATION INSTRUMENT

Well-suited for the cleaning of the furcations of multi rooted teeth.

Furcator KS

- LMErgoSense** LM 259-260 ES
- LMErgoMax** LM 259-260 XSI

- Delicate, angled excavator
- Suitable also for the cleaning of narrow approximal concavities and grooves in incisors and premolars
- For cleaning of the furcation roof and inner surfaces, particularly concavities and grooves in them

Handle options:

LMErgoSense

LMErgoMax

LMErgoNorm

HOE SCALERS

For the removal of supra- and subgingival calculus.

Suitable for deep, narrow pockets and concave root surfaces. For both vertical and horizontal techniques.

Design:

- Fine hoe-shaped blade with rounded corners
- Elliptical cutting edge

Sharpening

Hoe Scaler, anterior

- LMErgoSense** LM 112-113 ES
- LMErgoMax** LM 112-113 XSI
- LMErgoNorm** LM 112-113 SI

- For the anterior labial and lingual surfaces
- Works well also with lower incisors that are orally inclined

Clinical use

Hoe Scaler, lateral

- LMErgoSense** LM 134-135 ES
- LMErgoMax** LM 134-135 XSI
- LMErgoNorm** LM 134-135 SI

- For the buccal and lingual surfaces of all teeth
- Can also be used for furcations.

Clinical use

Hoe Scaler, posterior

- LMErgoSense** LM 156-157 ES
- LMErgoMax** LM 156-157 XSI
- LMErgoNorm** LM 156-157 SI

- For the mesial and distal surfaces of molars
- Can also be used for furcations

Clinical use

LM-ERGOHOLD 3 SURGICAL HANDLE

LM-ErgoHold 3

- LMErgoHold** LM 9003

- Excellent grip with elastic silicone coating
- Precise blade control
- Controlled rotation
- Blade position responsiveness maintained
- Controlled movement through tissue
- Fits all blades with fitment No. 3 (blades 10, 10A, 11, 11K, 11P, 12, 12D, 15, 15C and 15S)

GRACEY FINISHING CURETTES

Area specific curettes for the removal of deep subgingival calculus. For the finishing of subgingival root surfaces.

Instrumentation:

Place the tip third or half of the cutting edge of a Gracey curette against the tooth surface. (The larger outer curve is always the cutting edge.) Make sure that the lower shank is parallel with the tooth surface. For calculus removal apply moderate and for root planing light lateral pressure and activate the curette by using vertical, diagonal or horizontal pull strokes.

Design:

- Working surface inclined 20° to the lower shank
- One curved cutting edge (red line)
- Rounded cutting tip

Handle options:

Area specific indications for Gracey curettes:

Incisors

- All surfaces

Premolars and molars

- Buccal-lingual

- Distal

STANDARD AND MINI GRACEY

Mini Gracey has longer lower shank and smaller working end than in the standard model. Functions well in deep narrow pockets.

Gracey 1/2

- LM-ErgoSense LM 201-202 ES
- LM-ErgoMax LM 201-202 XSI
- LM-ErgoNorm LM 201-202 SI

- For incisors and premolars

Available also as Sharp Diamond coated sharpen free LM-ErgoSense instrument, see page 18.

Mini Gracey 1/2

- LM-ErgoSense LM 201-202M ES
- LM-ErgoMax LM 201-202M XSI
- LM-ErgoNorm LM 201-202M SI

Gracey 3/4

- LM-ErgoSense LM 203-204 ES
- LM-ErgoMax LM 203-204 XSI
- LM-ErgoNorm LM 203-204 SI

- For incisors and premolars

Gracey P3-P4

- LM-ErgoSense LM 266-267 ES
- LM-ErgoMax LM 266-267 XSI
- LM-ErgoNorm LM 266-267 SI

- Short shank makes the instrument more rigid

Gracey 5/6

LMErgoSense	LM 205-206 ES
LMErgoMax	LM 205-206 XSI
LMErgoNorm	LM 205-206 SI

- For incisors and premolars
- Especially useful in proximal surfaces

Gracey 9/10

LMErgoSense	LM 209-210 ES
LMErgoMax	LM 209-210 XSI
LMErgoNorm	LM 209-210 SI

- For molars' buccal and lingual surfaces using horizontal technique

- For molars' mesial surfaces
- Blade shank more sharply angulated than in Gracey 11/12 for better access

MESIAL-DISTAL GRACEY

Combining a mesial and a distal working end in one instrument. Useful when treating one quadrant at a time.

All mesial-distal Graceys have code rings that make it easy to identify which working end is mesial and which distal.

Gracey 11/14

- LM**ErgoSense LM 211-214 ES

EXCHANGEABLE TIPS

LM-ErgoMix

LM-ErgoMix hand instrument series offers the dental team a specially economical, ecological and ergonomic alternative. Whenever there is a need for a tip replacement the lock grip is opened, a new tip is inserted and the lock grip is closed again. No extra tools are needed.

Use LM-ErgoMix instruments in the normal way, clean and sterilize it like any other instrument. The sealed construction guarantees high level hygiene.

Benefits of retipping:

- Always sharp instruments
- Minimizes waste
- Enables personalized tip combinations.

TITANIUM TIPS FOR IMPLANTS

A great instrument series for implant maintenance. The ErgoMix structure ensures excellent tactile sensitivity and optimal rigidity.

Tips are made of sensitive but still effective titanium, which will not harm the abutments.

Implant Mini Universal curette

LM-ErgoMix LM 283-284MTi EM

- Delicate working end
- Especially for tight interdental spaces

Implant Mini Gracey 1/2

LM-ErgoMix LM 201-202MTi EM

- For incisors and premolars

Implant Mini Gracey 11/12

LM-ErgoMix LM 211-212MTi EM

- For premolars' and molars' mesial surfaces

Implant Mini Gracey 13/14

LM-ErgoMix LM 213-214MTi EM

- For premolars' and molars' distal surfaces

LM-PerioSet 1

LM-ErgoSense LM 6652 ES
LM-ErgoMax LM 6652 XSI

Includes:
LM-Servo 5 cassette, Mini Sickle, Curette McCall 17-18,
Gracey 1/2, Gracey 11/12, Gracey 13/14

LM-PerioSet 2

LM-ErgoSense LM 6682 ES
LM-ErgoMax LM 6682 XSI

Includes:
LM-Servo 8 cassette, Mini Sickle, Curette McCall 17-18,
Gracey 1/2, Gracey 9/10, Gracey 11/12, Gracey 13/14,
Mini Gracey 15/16, Mini Gracey 17/18

LM-PerioKit

LM-ErgoSense LM 6842 ES

*Exclusively selected
by Dr. Giano Ricci / Style Italiano*

Includes:
Implant Mini Universal curette, Concavity File SV 5-6,
Mini Gracey 13-14, Mini Gracey 11-12, Mini Gracey 7-8,
McCall 17S-18S, North Carolina Probe, Furcation Probe,
LM-Servo 8 cassette

Powered by

STYLEITALIANO

“ The LM-PerioKit by
Style Italiano contains
the essentials for the
best possible therapy.

Instruments have been selected in the
spirit of Style Italiano whose philosophy
is to make treatment feasible,
teachable, repeatable. Periodontal
therapy too can follow this approach.
It's my feeling that, in the best interest
of his patients, every practitioner should
be able to properly execute non surgical
therapy, crown lengthening procedures,
free gingival grafts, simpler surgical root
coverages.”

Giano Ricci
MD. DDS. MScD.

SPOON EXCAVATORS

For the removal of softened carious dentin and temporary fillings.

Design:

- Spoon-shaped working end
- Rounded tip
- Long cutting edge, which can easily treat broader areas

Handle options:

LMergoSense

LMergoMax

LMergoNorm

Spoon Excavator, 1.0 mm

- LMergoSense LM 522-523 ES
- LMergoMax LM 522-523 XSI
- LMergoNorm LM 522-523 SI

Spoon Excavator, 1.5 mm

- LMergoSense LM 533-534 ES
- LMergoMax LM 533-534 XSI
- LMergoNorm LM 533-534 SI

ROUND EXCAVATORS

Cariology:

- For the removal of softened, carious dentin
- For the removal of temporary fillings

Surgery:

- To sever the periodontal ligament prior to extraction
- For the removal of granulation tissue after extraction

Design:

- Round working end
- Curved cutting edge

Round Excavator, 1.0 mm

- LMergoSense LM 61-62 ES
- LMergoMax LM 61-62 XSI
- LMergoNorm LM 61-62 SI

Round Excavator, 1.5 mm

- LMergoSense LM 63-64 ES
- LMergoMax LM 63-64 XSI
- LMergoNorm LM 63-64 SI

Round Excavator, 2.0 mm

- LMergoSense LM 65-66 ES
- LMergoMax LM 65-66 XSI
- LMergoNorm LM 65-66 SI

TRIPLE-ANGLED BACK ACTION EXCAVATORS

Cariology:

- For removing carious dentin
- For undermining enamel during tissue-saving preparations
- For the horizontal finishing of outer cavity margins

Periodontics:

- For the removal of calculus from hard to reach areas such as the lower anterior lingual surfaces
- For the depuration of concave root grooves and furcations

Surgery:

- For the removal of granulation tissue in connection with apical resections, flap operations, or extractions

Design:

- Round working end and curved cutting edge
- Shank angulations ease treatments on hard to reach buccal, distal, and lingual surfaces

The blade shank is triple-angled, allowing for "back action" functions

Triple-angled Back Action Excavator, 1.0 mm

LMErgoSense	LM 611-621 ES
LMErgoMax	LM 611-621 XSI
LMErgoNorm	LM 611-621 SI

Triple-angled Back Action Excavator, 1.5 mm

LMErgoSense	LM 631-641 ES
LMErgoMax	LM 631-641 XSI
LMErgoNorm	LM 631-641 SI

Triple-angled Back Action Excavator, 2.0 mm

LMErgoSense	LM 651-661 ES
LMErgoMax	LM 651-661 XSI
LMErgoNorm	LM 651-661 SI

Triple-angled Back Action Excavator, 3.5 mm

LMErgoSense	LM 671-681 ES
LMErgoMax	LM 671-681 XSI
LMErgoNorm	LM 671-681 SI

- For the horizontal finishing of outer cavity margins

GINGIVAL MARGIN TRIMMERS

For finishing enamel margins in the proximal area as well as for making plastic, amalgam and ceramic fillings.

Gingival Margin Trimmer, 1.2 mm, distal

LMErgoSense	LM 121-122 ES
LMErgoMax	LM 121-122 XSI
LMErgoNorm	LM 121-122 SI

Gingival Margin Trimmer, 1.2 mm, mesial

LMErgoSense	LM 125-126 ES
LMErgoMax	LM 125-126 XSI
LMErgoNorm	LM 125-126 SI

SPATULA

Spatula

LMErgoSense	LM 450-460 ES
LMErgoMax	LM 450-460 XSI
LMErgoNorm	LM 450-460 SI

CORD PACKERS

For packing retraction cord into the gingival pocket.

The bent blade enables getting around the tooth as well as the packing of the cord using vertical motions.

Cord Packer, 2.0 mm

LMErgoSense	LM 490-491 ES
LMErgoMax	LM 490-491 XSI
LMErgoNorm	LM 490-491 SI

Cord Packer, 2.6 mm

LMErgoSense	LM 492-493 ES
LMErgoMax	LM 492-493 XSI
LMErgoNorm	LM 492-493 SI

BASE CARRIERS

For carrying base or thin liner to dentin surfaces.

Base Carrier, rigid

- LMErgoSense** LM 29H-30H ES
- LMErgoMax** LM 29H-30H XSI
- LMErgoNorm** LM 29H-30H SI

Base Carrier - Condenser, malleable tip

- LMErgoSense** LM 30-34 ES
- LMErgoMax** LM 30-34 XSI
- LMErgoNorm** LM 30-34 SI

- Tip (30) can be bent into the desired form, allowing for easier access to hard to reach areas

Base Carrier - Condenser, rigid

- LMErgoSense** LM 30H-34 ES
- LMErgoMax** LM 30H-34 XSI
- LMErgoNorm** LM 30H-34 SI

PLUGGERS

For packing all types of filling materials.

Plugger, cylindrical, 1.0-1.5 mm

- LMErgoSense** LM 340-360 ES
- LMErgoMax** LM 340-360 XSI
- LMErgoNorm** LM 340-360 SI

Plugger, cylindrical, 1.2-2.0 mm

- LMErgoSense** LM 350-380 ES
- LMErgoMax** LM 350-380 XSI
- LMErgoNorm** LM 350-380 SI

Plugger, cylindrical, 1.8-2.5 mm

- LMErgoSense** LM 370-390 ES
- LMErgoMax** LM 370-390 XSI
- LMErgoNorm** LM 370-390 SI

BURNISHERS

For burnishing, modelling and finishing of fillings.

Burnisher

- LMErgoSense** LM 31-32 ES
- LMErgoMax** LM 31-32 XSI
- LMErgoNorm** LM 31-32 SI

- For burnishing fillings at cavity margins
- For packing and shaping of composite fillings
- For packing of inlay/onlay fillings

Burnisher - Plugger, ball-ended, 1.5-2.5 mm

- LMErgoSense** LM 471-473 ES
- LMErgoMax** LM 471-473 XSI
- LMErgoNorm** LM 471-473 SI

- For plugging filling into cavity
- For polishing
- For plugging and shaping of composite fillings

Burnisher 27-29

- LMErgoSense** LM 476-477 ES
- LMErgoMax** LM 476-477 XSI
- LMErgoNorm** LM 476-477 SI

- For shaping of occlusal surfaces
- For burnishing of fillings at cavity margins

Burnisher 21

- LMErgoSense** LM 372-373 ES
- LMErgoMax** LM 372-373 XSI
- LMErgoNorm** LM 372-373 SI

- For shaping and packing of composite fillings
- For shaping of occlusal surfaces before hardening
- Pits, grooves, lateral ridges

RESTORATION – LM-ARTE

LM-Arte is a set of innovative instruments for aesthetic restorations and designed especially for composite layering. Each instrument is color-coded and named by its main function to enable easy, efficient and quick restorative treatments.

LM-Arte instruments have been developed in co-operation with Style Italiano, a study group of passionate clinicians and researchers specialized in aesthetic restorative dentistry.

Founders of Style Italiano, Walter Devoto DDS and Angelo Putignano MD, DDS.

LM-Arte Applica

LMErgoSense LM 46-49 ES
LMErgoMax LM 46-49 XSI

- A very thin and flexible spatula for transporting and modeling of the composite

LM-Arte Applica Twist

LMErgoSense LM 464-494 ES
LMErgoMax LM 464-494 XSI

- Thin and narrow spatula with bended angles for modeling difficult to reach areas such as approximal walls or the marginal ridge in matrix

LM-Arte Modella

LMErgoSense LM 442-443 ES
LMErgoMax LM 442-443 XSI

- A very thin and flexible spatula for transporting and modeling of the composite

LM-Arte Condensa

LMErgoSense LM 488-489 ES
LMErgoMax LM 488-489 XSI

- A long and round plugger especially for modeling composite

Handle options:

LMErgoSense

LMErgoMax

LMErgoNorm

LM-Arte Fissura

LMErgoSense LM 481-487 ES
LMErgoMax LM 481-487 XSI

- Sharp pointed tips for modeling of occlusal surface structures

LM-Arte Eccesso

LMErgoSense LM 307-308 ES
LMErgoMax LM 307-308 XSI

- For the removal of composite and bonding residue

NEW

LM-Arte Misura

LMErgoSense LM 496-497 ES
LMErgoMax LM 496-497 XSI

- For horizontal and vertical measuring of thickness (not plural) of composite layers on the restorations

LM-Arte Posterior Misura

LMErgoSense LM 498-499 ES
LMErgoMax LM 498-499 XSI

- For horizontal and vertical measuring of thickness of composite layers on the posterior restorations
- The fork shaped tip allows measuring and modeling of the composite wall with the presence of a matrix

LM-Arte Set

LMErgoSense LM 6840 ES
LMErgoMax LM 6840 XSI

- Includes:
- LM-Arte Applica, LM-Arte Condensa, LM-Arte Fissura, LM-Arte Misura, LM-Arte Eccesso, LM-Servo 5 cassette

LM-GENGIVA

Gingival retracting kit

LMErgoSense LM 7556K ES
LMErgoMax LM 7556K XSI

Includes products:

- LM-Gingiva / LM-MultiHolder PK III hand instrument
- See more on page 44

LM-Gingival Retractors (blue)

- For establishing optimum working conditions for procedures at the gum line.
- Assortment package of three sizes (ca 90 pieces, 30 pcs/size):
 - S for incisors
 - M for premolars
 - XL for molars
- See more on page 45

LM-MultiLever

- For the removal of disposable gingival retractors

RESTORATION – DARK DIAMOND COATED INSTRUMENTS

LM-ErgoSense Dark Diamond instruments with non-stick coating for easy placing and contouring of composite resins. The diamond like coating reduces the stickiness and allows for pleasant and precise restorative instrumentation.

Dark Diamond features:

- Exclusive diamond like coating
- Hard surface
- Smooth surface
- Dark color coating
- LM-ErgoSense handle

Benefits:

- Non-stick placement and sculpting of the composite resin
- Not sensitive to scratches
- Easy to clean
- Maximum contrast against the filling & minimal reflections
- Extreme precision and feel

Dark Diamond instruments can be cleaned and sterilized similarly to all other LM instruments.

Dark Diamond coating makes the surface of the tip extremely smooth and hard and allows for non-stick application and modeling of composite.

LMErgoSense
DARK DIAMOND

Burnisher

LMErgoSense LM 31-32DD ES

- Dark Diamond non-stick coating
- For packing and modeling composite

Burnisher - Plugger, ball-ended, 1.5-2.5 mm

LMErgoSense LM 471-473DD ES

- Dark Diamond non-stick coating
- For modeling composite

Modeller MH

LMErgoSense LM 708-709DD ES

- Dark Diamond non-stick coating
- For packing large approximal fillings
- Cylinder shaped working end will not get stuck into the composite while light curing

Modeller MH Mini

LMErgoSense LM 707-708DD ES

- Dark Diamond non-stick coating
- For packing small and medium approximal fillings
- Cylinder shaped working end will not get stuck into the composite while light curing

Packer-Modeller IO

LMErgoSense LM 482-483DD ES

- Dark Diamond non-stick coating
- For packing and modeling composite
- Conical working ends optimal for shaping occlusal surfaces

Plastic instrument, anterior

LMErgoSense LM 43-47DD ES

- Dark Diamond non-stick coating
- For placing, packing and contouring composite

Plastic instrument, posterior

LMErgoSense LM 48-702DD ES

- Dark Diamond non-stick coating
- For placing, packing and contouring composite

Mini Spatula

LMErgoSense LM 444-445DD ES

- Dark Diamond non-stick coating
- For placing and contouring composite

Handle options:

LMErgoSense

LMErgoMax

LMErgoNorm

FOR COMPOSITES

Flow Instrument IO

- LMErgoSense** LM 484-485 ES
- LMErgoMax** LM 484-485 XSI

- For easy handling and shaping of flowable composites

Modeller MH

- LMErgoSense** LM 708-709 ES
- LMErgoMax** LM 708-709 XSI

- For packing large, approximal fillings in several layers
- Cylinder shaped working ends won't get stuck into the composite while light curing
- For pressing the matrix band in place while curing

Modeller MH Mini

- LMErgoSense** LM 707-708 ES
- LMErgoMax** LM 707-708 XSI

- For packing small or medium approximal fillings in several layers
- Cylinder shaped working ends won't get stuck into the composite while light curing
- For pressing the matrix band in place while curing

Packer-Modeller IO p

- LMErgoSense** LM 482-702 ES
- LMErgoMax** LM 482-702 XSI
- LMErgoNorm** LM 482-702 SI

- Combination instrument for premolars

Packer-Modeller IO

- LMErgoSense** LM 482-483 ES
- LMErgoMax** LM 482-483 XSI
- LMErgoNorm** LM 482-483 SI

- Conical working ends, which are exceptionally well-suited e.g. to shaping of occlusal surfaces and to packing of all kinds of plastics
- Composites do not stick to the highly polished blades

Packer-Modeller IO m

- LMErgoSense** LM 483-703 ES
- LMErgoMax** LM 483-703 XSI
- LMErgoNorm** LM 483-703 SI

- Combination instrument for molars

Plastic Instrument, anterior

- LMErgoSense** LM 43-47 ES
- LMErgoMax** LM 43-47 XSI
- LMErgoNorm** LM 43-47 SI

- For placing, packing and contouring composite

Plastic Instrument, posterior

- LMErgoSense** LM 48-702 ES
- LMErgoMax** LM 48-702 XSI
- LMErgoNorm** LM 48-702 SI

- For placing, packing and contouring composite

Form Condenser, 1.5-2.5 mm

- LMErgoSense** LM 702-703 ES
- LMErgoMax** LM 702-703 XSI
- LMErgoNorm** LM 702-703 SI

- For shaping and packing of large filling surfaces

Composite Spatula 6

- LMErgoSense** LM 446-447 ES
- LMErgoMax** LM 446-447 XSI
- LMErgoNorm** LM 446-447 SI

- For placing and contouring composite

Mini Spatula

- LMErgoSense** LM 444-445 ES
- LMErgoMax** LM 444-445 XSI
- LMErgoNorm** LM 444-445 SI

- For placing and contouring composite

CARVERS

For shaping of filling material to fit the anatomy of tooth, and for removal of soft excess.

1/2 Hollenback

- LMErgoSense** LM 741-751 ES
- LMErgoMax** LM 741-751 XSI
- LMErgoNorm** LM 741-751 SI

- For proximal and cervical surfaces

Nystrom I

- LMErgoSense** LM 74-75 ES
- LMErgoMax** LM 74-75 XSI
- LMErgoNorm** LM 74-75 SI

- For proximal and occlusal surfaces

Nystrom III

- LMErgoSense** LM 76-77 ES
- LMErgoMax** LM 76-77 XSI
- LMErgoNorm** LM 76-77 SI

- For interdental spaces, contact surfaces

Maehlum

- LMErgoSense** LM 71-73 ES
- LMErgoMax** LM 71-73 XSI

- LMErgoNorm** LM 71-73 SI
- For removal of soft excess from gingival margins (71)
- For anatomical shaping of occlusal surfaces (73)

Universal Carver, occlusal-proximal

- LMErgoSense** LM 71-72 ES
- LMErgoMax** LM 71-72 XSI

- LMErgoNorm** LM 71-72 SI
- For removal of soft excess from gingival margins (71)
- For anatomical shaping of occlusal surfaces (72)

Cleoid-Discoid

- LMErgoSense** LM 731-732 ES
- LMErgoMax** LM 731-732 XSI

- LMErgoNorm** LM 731-732 SI
- For anatomical shaping of occlusal surfaces of small fillings

EXCESS SCALERS

Excess Scaler

- LMErgoSense** LM 785-795 ES
- LMErgoMax** LM 785-795 XSI

- LMErgoNorm** LM 785-795 SI
- For the removal of adhesive, cement, and composite excesses

Mini Excess Scaler

- LMErgoSense** LM 784-794 ES
- LMErgoMax** LM 784-794 XSI

- LMErgoNorm** LM 784-794 SI
- An effective excess remover in extremely tight interdental spaces

FILLING REMOVER

Filling Remover

- LMErgoSense** LM 764-766 ES
- LMErgoMax** LM 764-766 XSI

- LMErgoNorm** LM 764-766 SI

- For the removal of temporary fillings and crowns
- For bridge removal during fitting

CROWN OFF

A groove is first burred from the lower edge of the crown up to the occlusal surface. The groove should be so deep that it reaches the cement. The Crown Off working end is placed longitudinally into the groove and turned as if spreading the groove. The blade is turned until the crown loosens and lifts up. The blade stays firmly in the groove and it is easy to control even when lot of force is used.

Crown Off

- LMErgoSense** LM 767-768 ES
- LMErgoMax** LM 767-768 XSI

- Blade double angled with a 45° twist
- Can be used for all types of levering and removing in the mouth

INSTRUMENT SET

LM-CompoSet

- LMErgoSense** LM 6657 ES
- LMErgoMax** LM 6657 XSI

Includes:
LM-Servo 5 cassette, Mini Spatula, Plastic instrument, ant., Form Condenser, Packer-Modeller IO, Mini Excess Scaler

LM-CELLO STRIPHOLDER

Prophylactics:

- The removal of calculus from contact areas
- Preparation for flossing and toothpick use
- When finishing proximal surfaces, the strip can serve as a toothpaste applicator

Restoration:

- The finishing of proximal and contact surfaces
- Preparation for both rubber dam and matrix techniques

Esthetic and prosthetic care:

- The finishing of cement seams on laminates, cast fillings, and crowns

Orthodontics:

- Enamel stripping

LM-Cello stripholder
LM 2010 C

- Includes a sample for each strip (6 pcs).

Strip selection

package 50 pcs, coarseness 60µm

- Use the LM code rings to mark pre-fitted strips for mesial (orange) or distal (blue) surfaces.

Strips with blanks

Strips without blanks

- The smooth part of the strip is used when the contact is exceptionally tight

LM 5502
- One-sided, width 2 mm, thickness 0,12 mm

LM 5503
- One-sided, width 3 mm, thickness 0,12 mm

LM 5503D
- Double-sided, width 3 mm, thickness 0,18 mm

LM 5512
- One-sided, width 2 mm, thickness 0,12 mm

LM 5513
- One-sided, width 3 mm, thickness 0,12 mm

LM 5513D
- Double-sided, width 3 mm, thickness 0,18 mm

LM-MULTIHOLDER SYSTEM

LM-MultiHolder instruments and different kinds of replaceable plastic working ends – a real multi-function instrument!

- Angle options allow for easy access to even the more complex areas
- Optimal combination of steel and plastic – the steel shank is rigid and only the working end will flex, when required

LM-MultiHolder PK I

- LMErgoSense LM 750-756 ES
- LMErgoMax LM 750-756 XSI
- LMErgoNorm LM 750-756 SI

LM-MultiHolder PK II

- LMErgoSense LM 752-754 ES
- LMErgoMax LM 752-754 XSI
- LMErgoNorm LM 752-754 SI

LM-MultiHolder PK III

- LMErgoSense LM 752-756 ES
- LMErgoMax LM 752-756 XSI

- Part of the Gengiva concept by Style Italiano, see page 39

Handle options:

LMErgoSense

LMErgoMax

LMErgoNorm

WORKING ENDS FOR LM-MULTIHOLDER

LM-MultiLever

LM 7550

- For the removal of plastic working end

LM-Contact Formers

Transparent tip for making correctly formed and tight approximal contact.

- Suitable for use with all matrices
- Will not stick to composite fillings
- Disposable

Four sizes corresponding to the size of the cavity, circa 60 pcs / package

LM 7622	XS
LM 7624	S
LM 7626	M
LM 7628	L
LM 7620	Assortment package circa 120 pcs (30 pcs / size)

LM-Gingival Retractors (blue)

For establishing optimum working conditions for procedures at the gum line.

- Disposable

Three sizes, circa 60 pcs / package

LM 7502	S for incisors
LM 7504	M for premolars
LM 7506	XL for molars
LM 7500	Assortment package circa 90 pcs (30 pcs / size)

LM-Cervical Matrices

For making anatomically correct fillings at the gum line.

- Protects from moisture
- Prevents air bubbles
- Disposable

Four models for different size and shape, circa 60 pcs / package

LM 7602	for incisors
LM 7604	for canines and premolars
LM 7606	for small molars
LM 7608	for large molars
LM 7600	Assortment package circa 120 pcs (30 pcs / size)

LM-MultiHolder IntroKit

Introkit contains LM-MultiHolder instruments PK I and PK II (XSI or ES), MultiLever and samples of all available working ends.

There are a total of 44 working ends, 4 for each size of each working end.

LM 7555K ES
LM 7555K XSI

- You may order LM-MultiHolder IntroKit sample package also separately: LM 7555

LM-ENDOMAX

LM's endodontic hand files with large handles are supreme in ergonomics.

Soft and thick silicone handle improves the grip and makes filing and rotating more comfortable. LM-EndoMax files and reamers adhere to the contour of the canal, cleaning all surfaces evenly and effectively.

- Improved tactile sensitivity
- Greater working comfort
- Improved torque and force transmission
- Visible identification labels
- Color coding according to ISO specifications

LM-EndoMax Reamers

LM-Reamers have loosely twisted and flexible triangular cross-section instrument blades. The instrument is primarily designed for the apical preparation of straight canals, which is why the blade can also be used for cutting. For this instrument, a rotating preparation motion is the most effective.

	Lenght	21 mm	25 mm	31 mm	Individual packages (pcs/pack.)

**Assortment 045-080 includes: 045, 050, 055, 060, 070, 080

LM-EndoMax K-files

LM's K-Files have an extremely flexible triangular profile blade. The larger cutting angle enhances instrument use compared to a similar square profile instrument. Preparation waste can also be removed from the canal more easily, because there is more room in the instrument threads. The threads are tightly spaced and the tip is sharp, making the instrument ideally suited to the preparation of straight canals using filing and rotating motions. Small sizes (006 - 015) can also be used in preparation of curved canals. A short, back-and-forth preparation motion is most effective for the instrument.

	Lenght	21 mm	25 mm	31 mm	Individual packages (pcs/pack.)
	ø ISO	Code	Code	Code

LM-EndoMax Hedstroems

The blade on LM-Hedstroem files is milled instead of twisted like on other root canal instruments. Especially well suited to procedures where space is made for the root canal orifice (coronal flare). Hedstroem files are only intended for use with filing, back-and-forth preparation motions.

LM-EndoMax NiTi Files

The material used for NiTi files differs from that used for K-files, whereas the file form is the same on both. NiTi (Nickel-Titanium) is an elastic material, which will return to its original shape after bending or deformation. The instrument tip is not used for cutting, which makes LM NiTi instruments ideal for the preparation of curved canals. Both a filing and rotating preparation motion are suitable for these instruments.

ROOT CANAL EXPLORER

The instrument's long, sharp tips facilitate the location and opening of root canals to provide access for proper preparation instruments.

Important! Only use the instruments for the purpose which they are intended!

Root Canal Explorer

- LM ErgoSense LM 27-28 ES
- LM ErgoMax LM 27-28 XSI
- LM ErgoNorm LM 27-28 SI

Handle options:

- LM ErgoSense
- LM ErgoMax
- LM ErgoNorm

ROOT CANAL EXCAVATORS

Root canal excavators have longer lower shanks and sharper blade angles than round excavators.

- Extended and correctly angled shanks as well as highly effective blade angles allow for the preparation of all types of pulp cavities
- Effective for the cleaning of pulp chambers and location of root canals as well as the removal of temporary fillings

Root Canal Excavator, 1.0 mm

- LM ErgoSense LM 612-622 ES
- LM ErgoMax LM 612-622 XSI

ENDO SPREADERS

For the compacting of root canal filling materials during lateral condensation.

Endo Spreader 0.4 mm

- LM ErgoSense LM 24 ES
- LM ErgoMax LM 24 XSI

Endo Spreader 0.23 mm

- LM ErgoSense LM 22 ES
- LM ErgoMax LM 22 XSI

ENDO PLUGGER

For the vertical plugging of root canal fillings.

Endo Plugger, 0.5 - 1.0 mm

- LM ErgoSense LM 41-42 ES
- LM ErgoMax LM 41-42 XSI
- LM ErgoNorm LM 41-42 SI

Extract with confidence & luxate atraumatically

Familiar LM ergonomics and tactile sensitivity also in extracting instruments

- Ergonomic design
 - comfortable to hold and easy to rotate
- Secure LM-ErgoTouch surface
 - light, non-slip grip
- Well-balanced
 - controlled grip
- Lightweight
 - less strain on the hands
- Clear color-coding
 - easy identification
- LM-DuraGradeMAX supersteel
 - strong and sharp blades
- Tight seam at blade juncture
 - hygienic

LM-LIFTOUT

Luxating instruments for atraumatic extraction.

LM-LiftOut instruments allow tooth extraction to be done as atraumatically as possible. This is important in order to enable rapid healing and future implant placement. The thin tip of the instrument is introduced into the periodontal space and slowly advanced toward the apex of the root while twisting the instrument gently back and forth. LM-LiftOut is not suitable for use as an elevator.

LM-SLIMLIFT

Luxating instruments designed for extremely narrow places.

LM-SlimLift instruments are especially designed to reach places you cannot go with traditional luxating instruments. It allows tooth extraction to be done as atraumatically as possible. This is important in order to enable rapid healing. The extremely fine tip of the instrument is introduced into the very narrow periodontal space. The instrument is slowly advanced towards the apex of the root while turning the instrument gently back and forth. The LM-SlimLift is not suitable for use as an elevator.

MAINTENANCE

Cassette

LM 810001

LM extraction instruments are supplied in a convenient cassette that protects both the instrument and the handler during the maintenance cycle. The cassette keeps the instrument from puncturing the sterilization pouch, so sterility is more likely to be assured.

- The cassette can be color-coded
- The cassette is compatible with LM-ServoMax tray

Sharpening stone

LM 818002

Sharpen the extractors occasionally using the round sharpening stone as a simple and quick way to keep them in top condition and always ready to use.

- Suitable for LM-SlimLift, LM-LiftOut, LM-TwistOut and LM-RootOut instruments

LM-TWISTOUT

Elevators for forceful extraction.

LM-TwistOut instruments are suitable for tooth extraction in situations where strong force or torque must be applied.

ROOT TIP INSTRUMENTS

Root Tip Pick

LMErgoSense LM 769-771 ES

LMErgoMax LM 769-771 XSI

- For the removal of root tip
- Suits well in all difficult to reach areas

LM-RootOut
LM 812210

- Designed for delicate root teasing procedures
- Not recommended for more substantial root tip removal
- Similar to Heidbrink root tip picks
- Ergonomically designed handle for a good grip

NEW

IMPLANT SURGERY – INSTRUMENTS FOR IMPLANT POSITIONING

Optimal implant insertion

Guiding for correct mesio-distal implant insertion

LM Implant Misura MR instruments help positioning the first spiral drill at a correct distance from the pillar i.e. implant or natural element adjacent to the implant and respecting the bone biology.

This results in correct amount of bone between the implant and the tooth, so that the bone crest remains stable over time. Once the biology is respected and the case is spaced correctly, a long lasting esthetic result is established.

Implant adjacement to a natural element

Implant adjacement to another implant in edentulous arch

LM Implant Misura MR by **STYLEITALIANO**

The instruments are designed by Marco Redemagni MD, DDS. Style Italiano is a study group of passionate clinicians and researchers specialized in aesthetic restorative dentistry.

"These instruments are really essential when it comes to positioning the first drill"

Marco Redemagni
MD, DDS

More information at www.styleitaliano.org and www.facebook.com/styleitaliano.

For more details and clinical information about LM Implant Misura MR, please scan the QR.

Markings on the tip facilitate checking bucco-lingual position of the implant drilling.

Choosing the correct size

The instruments are available in different diameters. Each instrument has a larger tip for insertion of adjacent implants and and a smaller tip for spacing an implant from a natural element.

Choose the right instrument size based on the implant diameter:

Instrument color	Initial drill Ø		Distance in mm	
	1.5 mm	2.0 mm	Tooth - Implant	Implant - Implant
Gray	3.4-3.5	4.0	3.0	5.0
Green	3.75	4.25	3.1	5.3
Yellow	4.0-4.1-4.15	4.6	3.3	5.6
Orange	4.3	4.8	3.4	5.8
Blue	4.8-4.85	5.35	3.7	6.3

LMActivator

LM-Activator aligns teeth, activates mandibular growth and expands the arch perimeter in mixed dentition.

Advantages

- Aligns and corrects sagittal and vertical relationships simultaneously.
- Anatomically designed slots for aligning individual teeth.
- Possibility to treat in mixed dentition:
 - Intercept interferences and early signs of malocclusions when the roots and ligaments are still developing
 - Support healthy growth and development of the face and jaw

Patient friendly

- Made of comfortable and flexible medical grade silicone.
- Biocompatible (ISO 10993 permanent contact). No coloring agents, PVC, phthalates, softeners, latex, bisphenol-A or fragrance agents.
- Simultaneous alignment, leveling and anteroposterior correction instead of separate stages.
- Myofunctional research show a correlation between malocclusions and orofacial dysfunctions.

INDICATIONS

<div> <div></div> Recommended </div> <div> <div></div> Can be considered </div>		Deciduous dentition	Early mixed dentition	Late mixed dentition	Early permanent dentition
Excess overjet, excess overbite, deep bite	Severe				
	Moderate				
	Mild				
Anterior crowding (incisors and canines)	Severe				
	Moderate				
	Mild				
Dentoalveolar anterior crossbite of 1-2 teeth	Severe				
	Moderate				
	Mild				
Rotated anterior teeth	Severe				
	Moderate				
	Mild				
Class II	Severe				
	Moderate				
	Mild				
Scissorsbite / Complete mandibular posterior lingual crossbite (i.e. mandibular posterior teeth completely on the lingual side of the maxillary posterior teeth)	Severe				
	Moderate				
	Mild				
Gummy Smile (Treatment start before the eruption of permanent maxillary central incisors)	Severe				
	Moderate				
	Mild				
Open bite (High-model of LM-Activator)	Severe				
	Moderate				
	Mild				

Contraindications:

- Skeletal Class III
- Midline discrepancy > 3mm*
- Very narrow upper arch*
- Palatally impacted teeth*
- Fully erupted anterior teeth that require torquing*
- Teeth requiring intrusion

* May be treated with combination treatment (LM-Activator together with other appliances such as quad helix)

The treating doctor is solely responsible and liable for diagnosis, treatment, and evaluating whether treatment with LM-Activator, LM-Trainer or any other LM-Dental product is appropriate for a specific patient, and for the outcome of any treatment with LM-Activator, LM-Trainer or any other LM-Dental product. Product used, and use of products shall be determined solely by doctor and evaluated for use with each individual patient where appropriate. Please refer to manufacturer's Instructions for use.

“Our results showed distinct improvements in overjet, overbite, sagittal molar relationship, and crowding in the treated subjects.”

Myrlund, Rita, et al. “One year treatment effects of the eruption guidance appliance in 7- to 8-year-old children: a randomized clinical trial.” The European Journal of Orthodontics (2014): cju014. <http://dx.doi.org/10.1093/ejo/cju014>

“An advantage of the eruption guidance appliance is that it not only guides the eruption of the teeth but also simultaneously acts on the transversal, sagittal, and vertical relationships of both dental arches.”

Keski-Nisula, Katri, et al. “Orthodontic intervention in the early mixed dentition: A prospective, controlled study on the effects of the eruption guidance appliance.” American Journal of Orthodontics and Dentofacial Orthopedics 133.2 (2008): 254-260. <http://dx.doi.org/10.1016/j.ajodo.2006.05.039>

LMActivator 2

New features: Incisal reinforcement for deep bite | Narrow and wide versions for different arch forms | Highest surface quality (A-1, SPI AR-106)

Reinforcement with hard incisal surfaces.

LM-Activator 2 Low Short

Model with a shorter molar section for patients whose second molars have not yet erupted. Delivered in a yellow box.

LM-ACTIVATOR MOTIVATIONAL MATERIAL

Patient compliance is essential for successful treatment. The first month is crucial in adopting the habit to use the appliance (because creating a habit in general requires 3-4 weeks of regularity). To motivate the patient and his/her family, age appropriate material is available for both preadolescents and adolescents. It is important to make sure the patient and his/her family understands that irregular use may be equivalent with no treatment at all.

LM-Activator 2 OrthoSizer

LM 9402 LM-Activator 2 OrthoSizer without a handle

- A further improved scale with measures for both mandible and maxilla.
- Measures the distance across the incisors from the distal surface of the left lateral incisor to the right lateral incisor both for the mandible and for the maxilla.

LMTrainer

LM-Trainer Medium
LM 94100T

- Slots for incisors and cuspids
- Lip bumper

LM-Trainer Small
LM 94100S

- Slots for incisors, lip bumper
- Smaller and softer than LM-Trainer Medium

LM-Trainer Braces
LM 94100TB

- Used in conjunction with brackets and wires
- Brings the mandible forward for Class II correction
- Prevents irritation and wounding of soft tissue
- Lip bumper

ORTHODONTIC HAND INSTRUMENTS

Mirror Handle, ortho

LMErgoSense	LM 25-26 ES
LMErgoMax	LM 25-26 XSI
LMErgoSense	LM 28-26 ES
LMErgoMax	LM 28-26 XSI

- For measuring overjet and overbite
- Millimeter scale, total length 25 mm

Ligature On-Off SL

LMErgoSense	LM 414-17CL ES
LMErgoMax	LM 414-17CL XSI

- The explorer-like end (17CL) for both application and removal of ligatures. Ligatures can be lined up on the lower shank.
- The forked end (414) is particularly suitable for guiding a ligature ring over e.g. the fourth wing of a bracket.

Plastic Ligature Applicator

LMErgoSense	LM 416-417 ES
LMErgoMax	LM 416-417 XSI
LMErgoNorm	LM 416-417 SI

- For placement of orthodontic rubber ligatures

Arch Wire Tucker

LMErgoSense	LM 412-413 ES
LMErgoMax	LM 412-413 XSI

- For bending the end of an arch wire
- The flattened ball-ends have 1 mm holes, where the wire can easily be placed and turned.
- Long blade fits well even in tight places.

Ligature Tucker - Scaler U15

LMErgoSense	LM 414-150 ES
LMErgoMax	LM 414-150 XSI
LMErgoNorm	LM 414-150 SI

- For tucking of ligatures and arch wires (414)
- For removing of cement excesses following the removal of orthodontic appliance (150)

Ligature Tucker

LMErgoSense	LM 414-415 ES
LMErgoMax	LM 414-415 XSI
LMErgoNorm	LM 414-415 SI

- For tucking of ligatures and arch wires
- For placement of arch wire
- The forked end is particularly suitable for guiding a ligature ring over e.g. the fourth wing of a bracket.

Ligature Director

LMErgoSense	LM 411-415 ES
LMErgoMax	LM 411-415 XSI

- For tucking ligatures and arch wires
- For placement of arch wire
- The forked end is particularly suitable for guiding a ligature ring over e.g. the fourth wing of a bracket. The forked end tip (411) is rotated 90° for more convenient & ergonomic use.

LM-SERVOMAX TRAY

LM-ServoMax – optimal work flow & rational maintenance.

LM-ServoMax tray system organises and rationalises the handling of dental instruments and accessories during the procedures and maintenance. It facilitates good infection control and saves time by reducing the handling of individual items. It also prolongs the life span of instruments and protects the personnel. Its versatile modules keep all instruments and accessories organised in a single tray. The system is adaptable to treatment specific and individual needs.

Rational maintenance with minimal handling

LM-SERVOMAX MODULES

■ All modules have a universal design with standard dimensions and are not manufacturer specific. They are made of exceptionally durable special plastic which tolerate all common cleaning and sterilisation methods and agents (max 134 °C / 273 °F). Modules are sold empty.

LM-ServoMax tray set
LM 6410

- Includes: 1 set of universal trappers and 2 metal clips
- Dimensions: 288 x 185 x 29 mm

LM-ServoMax universal trapper, 2 pcs
LM 6416

LM-ServoMax metal clips, 2 pcs
LM 6415

- For locking LM-Servo 5 or LM-Servo 8 instrument cassette on the tray

LM-ServoMax standard case
LM 6420

LM-ServoMax restoration / endo case
LM 6430

LM-ServoMax foam, 20 pcs
LM 6435

- For cleaning the endo files

LM-ServoMax ultrasonic tip case
LM 6460

- For six ultrasonic tips

LM-ServoMax bur endofile case
LM 6450

- For eight burs and fourteen files
- Includes adjustment and measuring scales for files

LM-ServoMax syringe holder
LM 6495

- A stand attachable to the LM-ServoMax tray to place the anaesthetic syringe safely in the needle guard

LM-ServoMax
waste cup holder
LM 6490

LM-ServoMax
instrument rack

-  LM 6471 black
-  LM 6472 orange
-  LM 6473 blue
-  LM 6474 red
-  LM 6475 green

- Colour coded rails for attaching instruments to the LM-ServoMax tray
- Length adjustable according to the size of instruments
- Package 2 pcs / color

LM-SERVO CASSETTES

- In LM-Servo cassettes hand instruments are locked securely but rotate freely for optimal cleaning and guaranteed infection control. The cassettes can be coded with silicone code buttons and attached to the LM-ServoMax tray with metal clips (LM 6415).

Pat

LM-Servo 5
LM 6650

- For five instruments
- Dimensions: 180 x 86 x 28 mm

Pat

LM-Servo 8
LM 6680

- For eight instruments
- Dimensions: 180 x 136 x 28 mm

LM-SERVO E CASSETTES

- The LM-Servo evolution series is designed to improve safety and traceability. The cassettes are equipped with safety shields preventing sharp prick injuries and protecting the blades. The option for RFID tagging enables complete and reliable traceability with unique LM Dental Tracking System™.
- The cassettes can be coded with silicone code buttons and attached to the LM-ServoMax with a special lock (LM 6417).

NEW

LM-Servo 5E

-  LM 6551 grey
-  LM 6552 blue
-  LM 6553 green
-  LM 6554 yellow

- For five instruments
- Cassette is equipped with safety shields
- Dimensions: 180 x 83 x 26 mm

NEW

LM-Servo 8E

-  LM 6581 grey
-  LM 6582 blue
-  LM 6583 green
-  LM 6584 yellow

- For eight instruments
- Cassette is equipped with safety shields
- Dimensions: 180 x 133 x 26 mm

CODING PRODUCTS

Code buttons

-  LM 6000 blue
-  LM 6001 green
-  LM 6002 orange
-  LM 6003 red
-  LM 6004 yellow
-  LM 6005 brown

- On all of the Servo cassettes' there are holes for code buttons
- Package 20 pcs / color

Code rings

-  LM 5000 blue
-  LM 5001 green
-  LM 5002 orange
-  LM 5003 red
-  LM 5004 yellow
-  LM 5005 black
-  LM 5006 white
-  LM 5007 brown
-  LM 5008 lavender
-  LM 5009 pink
-  LM 5010 dark grey
-  LM 5011 lime

- For coding hand instruments
- Package 50 pcs / color

Dental Tracking System™

Unique intelligence with RFID technology

LM has long been the pioneer in dental instrumentation. Working together with dental clinics has revealed many challenges in material handling and traceability. The logistics and instrument maintenance could be managed better and more effectively and there are increasing requirements for patient safety and documentation.

In designing the new LM-ErgoSense instrument LM developed the idea of an intelligent instrument. In addition to ergonomic comfort it offers unique opportunities to improve material handling and patient safety in the clinic. An advanced RFID chip can be integrated into all LM-ErgoSense instrument handles enabling complete and reliable traceability of the instrument simply by scanning the tiny RFID chip.

The built-in RFID technology together with scanning readers and software create a unique LM Dental Tracking System™ (DTS) which improves asset management and accelerate and document material flows.

DTS™ effectively allows you to monitor, track and log materials and instruments reducing the time and costs throughout the process. It helps to schedule the material purchases, keeps track of the instruments' circulation and provides valuable information regarding maintenance needs and instrument history. Traceability helps to ensure the use of only safe and clean instruments and takes the patient safety to a whole new level.

Knowing
is power.

More about the system on www.dentaltracking.com

INSTRUMENT HANDLING & MAINTENANCE – LM-RONDOPLUS SHARPENING MACHINE

Instruments used in treating hard tissue blunt quickly, naturally compromising efficiency and results. Periodontal instruments should be sharpened regularly.

Easy and quick

- Simple method - the blade is held in the correct sharpening position and the grinding stone rotates
- Sharpening one instrument only takes a few seconds

Versatile

- For both periodontal and preparation instruments
- For both right- or left-handed
- The direction of rotation can be selected

Accurate and safe

- A dual-position instrument rest. The upper position is for preparation instruments and the lower for periodontal instruments
- The original blade form is preserved
- Low rotational speed - the blade will not heat up nor will its temper be affected

The fine-grain ceramic stone is 400 grit. Finer and coarser sharpening stones are available as spare parts.

LM-RONDOPLUS SHARPENING MACHINE

■ Interactive demonstration and instruction CD and handy quick guide included!

Pat

LM-RondoPlus

LM 8600

Package includes:

Sharpening machine, foot pedal, 400 grit sharpening stone, 2 LM-Fingos,
5 emery tapes, instruction CD and quick guide

On either side of the LM-RondoPlus there are LM-Fingo test sticks. Sharpness can be tested both with Fingo mounted on the LM-RondoPlus or your finger. The Fingo is made of an acrylic plastic and is sized to fit all users.

Spare Parts

Grinding stone

LM 8630 Foot pedal

LM 8660 600 grit (white)

LM 8550 Emery tapes, 5 pcs

LM 8640 400 grit, coarser (grey)

LM 8602 LM-Fingo, 2 pcs

■ LM 8632 320 grit, coarsest (black)

LM 8606 LM-Fingo, 6 pcs

INSTRUCTIONS FOR INSTRUMENT MAINTENANCE

1. Pre-disinfection

Do not leave dirty instruments dry - put them into disinfecting solvent as soon as possible. Pay close attention to the correct dosages and exposure times. If you are using a thermodisinfectant, skip service cycle steps 1-2.

2. Rinsing

Rinse instruments thoroughly under warm running water.

3. Cleaning

Washing machine / Thermodisinfectant

Hand wash: Remove all visible dirt with warm water.

Use a soft brush and detergent.

Ultrasonic cleaner: use instrument cassettes to prevent damage.

4. Rinsing

Rinse instruments thoroughly under warm running water.

5. Drying

Dry instruments before sterilization.

6. Inspection and sharpening

Sharpen, service or replace instruments, if necessary.

Note! Do not sharpen LM Sharp Diamond instruments.

7. Packing

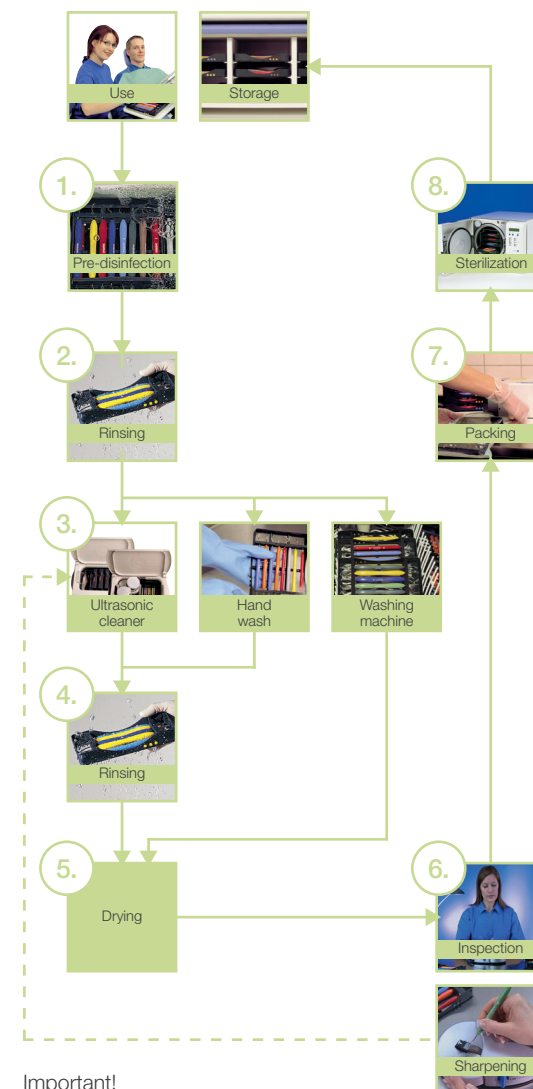

Pack serviced and cleaned instruments for sterilization.

8. Sterilization

Autoclave: place clean, dry and properly packed instruments into the autoclave.

Hot-air sterilization: place clean, dry and properly packed instruments into the hot-air sterilizer; do not fit them in too tightly; ensure that temperature is correct (max. 180 °C/355 °F).

Note! LM extraction instruments max 134 °C/273 °F.

Important!

- Regularly service the machines
- Follow all user instructions
- Pay special attention to correct dosage and exposure
- Use LM-Servo cassettes to protect the instruments and avoid sharp injuries
